

## Job Description - Conservation Scientist

**Designation:** Principal Scientist & Faculty

**Reports to:** Executive Director

**Start Date:** Open

### ABOUT THE POSITION

We seek a conservationist scientist with a background in wildlife ecology, environmental science, geography, public policy, GIS, remote sensing, economics or related interdisciplinary fields. The candidate should possess strong quantitative skills, demonstrated ability to lead and build independent research programs and fundraising track record. Candidates will work with multiple teams of researchers and conservationists at CWS.

### REQUIREMENTS

1. Ph.D. in conservation science, wildlife ecology, environmental science, ecology, geography, public policy, economics and related interdisciplinary fields.
2. Demonstrated experience in designing and implementing research programs focused on environmental and conservation issues and managing research teams.
3. Completion of a post doctoral fellowship.
4. Proven track record in fundraising.
5. Proven publication record in known peer-reviewed scientific journals.
6. Ability to teach courses in wildlife ecology and conservation.
7. Fluent spoken and written proficiency in English and Indian languages.

### APPLICATION MUST CONTAIN (in one pdf)

1. A one-page cover letter describing your interest in this position
2. 2-3 page note on proposed and ongoing research projects
3. Latest Resume/CV with relevant professional experience
4. References (minimum of 3 with contact details)
5. Writing samples (published research and popular articles)

### PAYSCALE

15 - 20 LPA depending on the work experience and background. Please write to Aishwarya (aishwarya.anilkumar@cwsindia.org) with the subject line "Application for Principal Scientist". Incomplete applications will not be reviewed.
